Videoconferencing video

Videoconferencing

In Neotel we launched our new free Videoconferencing service. Another solution for your communications integrated in our Virtual PBX. No need for installation or additional cost on the part of the client. Everything works through the cloud.

This module gives you the ability to make video calls with any device that has a camera, being compatible with all Operating Systems.

Generate a link by pressing a button, send it by email or SMS, and the recipient, when accessing it, will directly enter the Videoconference.

Transfer calls, record them if you choose and access a complete history of your incoming and outgoing video calls. In addition, an internal chat will be available for use inside your Call Center.

AT NO
ADDITIONAL COST

Videoconferencing

No installation
or additional
cost

All you need
is an Internet
connection

Video calls from
any device with a
camera

Compatible
with all Operating
Systems

Generate a link with just one click, send it via email or SMS. The addressee will access the Videoconference directly through this link.

Transfer your
video call
